● RCOP (Self-startup-group)

Dec. 2023 – Present

Have formed an excellent group of Tech enthusiasts and moreover like minded Individuals from Japan, South Korea and India, where we aim at solving the real world problem of Peace (SDG 16), by making a chats platform where people around the world can connect without barriers with power of AI.

About me & skills

Hello, I'm Priyant Banerjee, an enthusiastic and dedicated software developer, cybersecurity learner, and DSA practitioner. Currently, I am pursuing a B.Tech in Computer Science and Engineering, where I focus on creating innovative hardware and software solutions to solve real-world problems. My passion extends beyond my primary field of study; I also have a deep interest in Economics, which I am pursuing as a minor degree.

Additionally, I engage in self-study of Electrical and Electronics Engineering, developing various devices using SMDs, transistors, valves, and more.

Beyond my academic pursuits, I draw major inspiration from remarkable individuals who have made significant sacrifices for their nations, such as APJ Abdul Kalam and Subhas Chandra Bose. I also have a profound admiration for countries like Japan and South Korea, not only for their technological advancements but also for their enduring cultural values.

Personally, I enjoy exploring different cultures and cuisines, which broadens my perspective and enriches my understanding of the world. I am particularly fascinated by the intersection of technology and culture, and how technological advancements can preserve and promote cultural heritage.

In summary, I am a multifaceted individual with a relentless drive for learning and innovation. My diverse interests and dedication to making a positive impact define who I am and guide my aspirations for the future.
